Thanks Randy – We'll have to get you up to the site. I know that Dan is planning on an extensive planning effort of the fluvial tailings between Howardsville & Eureka along the Animas River the week of August 3rd. We are also planning on sampling some of the mine waste areas in Eureka Gulch – trib to the AR at the same time. And then ~ the 3rd week of Sept. will be the low-flow WQ sampling – lets get you on one of these field events.

Deliberative Process/Ex. 5

Otherwise it looked go to me. I would not know if the sampling locations are appropriate

as I have not been to the site.

Paula and Brent,

Attached you will find investigative work plans prepared by Sunnyside Gold Corporation as part of Sunnyside's continuing participation in the collaborative effort to improve water quality in the Animas River.

Sunnyside requests that you provide any comments that may improve the work plans at your earliest convenience such that adjustments can be made prior to implementation. The airborne geophysical survey, planned for July 20th, distributed earlier is an attachment to the Subsurface Investigation Work Plan. As a result of a comment by Peter Butler Co-Coordinator of ARSG, Sunnyside will also take water quality samples at A-68 and the Howardsville Gage on the day of the airborne survey to demonstrate the degree of water quality differential at the time of the survey.

Implementation of the attached plans except for the airborne geophysical survey is planned for August and September.

I would appreciate it if you would provide comments to me as soon as practicable.

Thanks,

Pat
